CWLP COMMUNITY ENERGY FORUM TUESDAY

City Water, Light and Power's next Community Energy Forum will be held on Tuesday, November 30th at 6 p.m. This meeting will focus on developing objectives of Springfield's Cool Cities Advisory Council, an update of the new Green Business Network of Springfield and a discussion of expanding Energy Efficiency Programs to be offered through CWLP's Energy Services office.

The Forum will be held at 6 p.m. at Illinois National Bank's Downtown Conference Center at Fourth and Jackson Streets. Refreshments will be served.

CWLP Community Energy Forums are designed to provide updates to the public on progress made regarding environmental and energy saving activities and to solicit suggestions and ideas from the community regarding energy programs and related issues. CWLP is using the input received from these meetings to enhance existing programs and develop new energy efficiency and conservation programs.

Public participation is encouraged to help CWLP develop the most effective and practical programs for its customers. CWLP customers wanting more information on this forum may call 789-2070.
