

**City Water, Light and Power
Coal Combustion Residuals Surface Impoundments**

**Assessment of Corrective Measures Extension in
Accordance with 40 CFR 257.96(a)**

May 2019

City Water, Light and Power (CWLP) owns and operates two existing coal combustion residual (CCR) surface impoundments. These CCR surface impoundments are identified as the Lakeside Ash Pond and the Dallman Ash Pond and are located northeast of the power plant complex in Springfield, Illinois. CWLP is currently characterizing the nature and extent of the release in accordance with 40 CFR 257.95(g), however due to poor weather conditions much of the site has been inaccessible, therefore we have been unable to install additional monitoring wells and sample in accordance with 257.95(d)(1). The additional monitoring wells are scheduled to be installed and sampled in May 2019. Therefore CWLP is extending the deadline for assessment of corrective measure by 60 days in accordance with 40 CFR 257.96(a).
